

St Joseph's Catholic Primary School

Progression in Working Scientifically

	EYFS	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
	Science at Foundation Stage is introduced indirectly through activities that encourage children to explore, problem solve, observe, predict, think, make decisions and talk about the world around them.	To use the following scientific methods, processes and skills (adult support may be needed).	To use the following scientific methods, processes and skills with increasing confidence .	To use the following scientific methods, processes and skills (adult support may be needed).	To use the following scientific methods, processes and skills (adult support may be needed).	To use the following scientific methods, processes and skills (adult support may be needed).	To use the following scientific methods, processes and skills (adult support may be needed).
Asking questions	<p>Comments and asks questions about aspects of their familiar world such as the place where they live or the natural world (30-50mths, UtW The World)</p> <p>Talk about why things happen and how things work (30-50mths, UtW The World)</p> <p>Respond to what they have heard, expressing their thoughts and feelings. (30-50mths, UtW The World)</p>	<p>Ask simple questions about the world around us.</p> <p>Begin to recognise different ways in which the might answer scientific questions</p>	<p>Ask simple questions about the world around us.</p> <p>Begin to recognise different ways in which the might answer scientific questions</p>	<p>Ask some relevant questions and use different types of scientific enquiries to answer them.</p> <p>Begin to raise their own questions about the world around them.</p> <p>Begin to make some decisions about which types of enquiry will be the best way of answering questions including observing changes over time, noticing patterns, grouping and classifying, carrying out simple</p>	<p>Ask some relevant questions and use different types of scientific enquiries to answer them.</p> <p>Raise their own questions about the world around them.</p> <p>Make some decisions about which types of enquiry will be the best way of answering questions including observing changes</p>	<p>Use their scientific experiences to explore ideas and raise different kind of questions.</p> <p>Begin to explore and talk about ideas, ask their own questions about scientific phenomena, analyse functions, relationships and interactions more systematically.</p> <p>Begin to select the most appropriate ways to answer science questions</p>	<p>Use their scientific experiences to explore ideas and raise different kind of questions.</p> <p>Explore and talk about ideas, ask their own questions about scientific phenomena, analyse functions, relationships and interactions more systematically.</p> <p>Select the most appropriate ways to answer science questions using different types of scientific enquiry</p>

	<p>Use a wider range of vocabulary.</p> <p>Understand a question or instruction that has two parts,</p> <p>Understand 'why' questions, like: "Why do you think the caterpillar got so fat?" (30-50mths, UtW The World)</p> <p>Ask questions to find out more and to check they understand what has been said to them. (40-60 months)</p>			<p>comparative and fair tests, finding things out using secondary sources.</p>	<p>over time, noticing patterns, grouping and classifying, carrying out simple comparative and fair tests, finding things out using secondary sources.</p>	<p>using different types of scientific enquiry (including observing changes over different periods of time, noticing patterns, grouping and classifying, carrying out comparative and fair tests and finding things out using a wide range of secondary sources of information.)</p>	<p>(including observing changes over different periods of time, noticing patterns, grouping and classifying, carrying out comparative and fair tests and finding things out using a wide range of secondary sources of information.)</p>
<p>I am beginning to ask a simple question about the world around me.</p>	<p>I can ask a few simple questions about the world around us.</p>	<p>I can ask a few simple questions about the world around us.</p>	<p>I can ask some relevant questions about the world around us.</p> <p>I can use some different types of scientific enquiry to answer questions.</p>	<p>I can ask relevant questions about the world around us.</p> <p>I can use different types of scientific enquiry to answer questions.</p>	<p>I am beginning to explore ideas and ask my own questions about scientific phenomena.</p>	<p>I can explore ideas and ask my own questions about scientific phenomena.</p>	

	I am exploring and thinking about the world around me.	I can begin to use some different types of enquiry to answer questions.	I can begin to use some different types of enquiry to answer questions.	I am beginning to decide which type of enquiry is best to answer my question.	I am beginning to decide which type of enquiry is best to answer my question.	I am beginning to plan different types of scientific enquiry to answer questions.	I can plan different types of scientific enquiry to answer questions.
	EYFS	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Developing Enquiry Planning and setting up different types of enquires	Develop manipulation and control. Explore different materials and tools. (22-36months) Explore natural materials, indoor and outdoor. Explore different materials freely, in order to develop their ideas about how to use them and what to make. (30- 50 months) Develop their own ideas and then decide which materials to use to express them. Join different materials and explore different	Experience different types of science enquiries, including practical activities (different types of enquiry including - observing changes over time, noticing patterns, grouping and classifying, carrying out simple comparative tests, finding things out from secondary sources).	Experience different types of science enquiries, including practical activities (different types of enquiry including - observing changes over time, noticing patterns, grouping and classifying, carrying out simple comparative tests, finding things out from secondary sources).	Be given a range of scientific enquiries including different types of scientific enquiries to answer questions Begin to explore everyday phenomena and the relationships between living things and familiar environments. Begin to develop their ideas about functions, relationships and interactions. Set up simple practical enquiries Recognise when a simple fair test is necessary and help	Be given a range of scientific enquiries including different types of scientific enquiries to answer questions Explore everyday phenomena and the relationships between living things and familiar environments. Begin to develop their ideas about functions, relationships and interactions. Set up simple practical enquiries	Talk about how ideas have developed over time. Begin to recognise some more abstract ideas and begin to recognise how these ideas help them to understand how the world operates. Begin to recognise scientific ideas change and develop over time. Begin to select and plan the most appropriate ways to answer science questions using different types of scientific enquiry (including observing changes over different	Talk about how ideas have developed over time. Begin to recognise more abstract ideas and begin to recognise how these ideas help them to understand how the world operates. Begin to recognise scientific ideas change and develop over time. Select and plan the most appropriate ways to answer science questions using different types of scientific enquiry (including observing changes over different periods of time, noticing patterns, grouping and classifying, carrying

	<p>textures. (30- 50 months) Explore different materials freely, in order to develop their ideas about how to use them and what to make. (30-50 months) Select and use activities and resources, with help when needed. This helps them to achieve a goal they have chosen, or one which is suggested to them. Articulate their ideas and thoughts in well-formed sentences. Connect one idea or action to another using a range of connectives. Use talk to help work out problems and organise thinking and activities explain how things work and</p>			<p>to decide how to set it up</p>		<p>periods of time, noticing patterns, grouping and classifying, carrying out comparative and fair tests and finding things out using a wide range of secondary sources of information.) Begin to recognise when and how to set up comparative and fair tests and explain which variables need to be controlled and why</p>	<p>out comparative and fair tests and finding things out using a wide range of secondary sources of information.) Recognise when and how to set up comparative and fair tests and explain which variables need to be controlled and why</p>
--	---	--	--	-----------------------------------	--	--	--

	<p>why they might happen.</p> <p>Return to and build on their previous learning, refining ideas and developing their ability to represent them. (40-60 months)</p> <ul style="list-style-type: none"> • 						
	I can explore the world around me.	I can begin to use some different types of enquiry to answer questions.	I can begin to use some different types of enquiry to answer questions.	I am beginning to decide which type of enquiry is best to answer my question.	I am beginning to decide which type of enquiry is best to answer my question.	I am beginning to plan different types of scientific enquiry to answer questions. I am beginning to decide which variables to control.	I can plan different types of scientific enquiry to answer questions. I can decide which variables to control.
	EYFS	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Performing test	<p>Explore natural materials, indoors and outside (22-36months)</p> <p>Explore and respond to different natural phenomena in their setting and on trips.</p> <p>Make connections between the features of their family and other families.</p> <p>Notice differences between people.</p>	<p>Carry out simple tests with support.</p> <p>To begin to discuss my ideas about how to find things out.</p> <p>To begin to say what happened in my investigation.</p>	<p>Carry out simple tests.</p> <p>To discuss my ideas about how to find things out.</p> <p>To say what happened in my investigation.</p>	<p>Begin to set up simple practical enquiries, comparative and fair tests</p> <p>Begin to recognise when a simple fair test is necessary and help to decide how to set it up.</p>	<p>Set up simple practical enquiries, comparative and fair tests.</p> <p>Recognise when a simple fair test is necessary and help to decide how to set it up</p>	<p>Begin to select and plan the most appropriate ways to answer science questions using different types of scientific enquiry (including observing changes over different periods of time, noticing patterns, grouping and</p>	<p>Select and plan the most appropriate ways to answer science questions using different types of scientific enquiry (including observing changes over different periods of time, noticing patterns, grouping and classifying, carrying out comparative and</p>

	<p>(22-36 months UTW)</p> <p>Explore material with different properties (22-36 months UTW) Use all their senses in hands on exploration of natural materials (30-35 months UTW)</p> <p>Repeat actions that have an effect. Explore materials with different properties. Explore natural materials, indoors and outside.</p> <p>Explore how things work. (30-50 months UTW)</p> <p>Plant seeds and care for growing plants. (30-50 months)</p> <p>Understand the key features of the life cycle of a plant and an animal. (30- 50 months)</p> <p>Describe what they see, hear and feel whilst outside.</p>			<p>Begin to think of more than one variable factor.</p>	<p>Can think of more than one variable factor.</p>	<p>classifying, carrying out comparative and fair tests and finding things out using a wide range of secondary sources of information.)</p> <p>Begin to recognise when and how to set up comparative and fair tests and explain which variables need to be controlled and why. Begin to suggest improvements to my method and give reasons. Begin to decide when it is appropriate to do a fair test.</p>	<p>fair tests and finding things out using a wide range of secondary sources of information.)</p> <p>Use test results to make predictions to set up further comparative and fair tests.</p> <p>Recognise when and how to set up comparative and fair tests and explain which variables need to be controlled and why Suggest improvements to my method and give reasons. Decide when it is appropriate to do a fair test.</p>
--	---	--	--	---	--	--	---

	<p>Explore the natural world around them (40- 60 months)</p> <p>Continue, copy and create repeating patterns. (40-60 months)</p>						
	<p>I am exploring the world around me.</p>	<p>I can begin to perform simple tests.</p> <p>I can begin to discuss my ideas.</p> <p>I can begin to say what happened in an investigation.</p>	<p>I can perform simple tests.</p> <p>I can discuss my ideas.</p> <p>I can say what happened in an investigation.</p>	<p>I can set up some simple practical enquiries. 				<p>they have already done.</p> <p>Am beginning to see a pattern in my results.</p> <p>Am beginning to say what I found out, linking cause and effect.</p> <p>Am beginning to say how I could make it better.</p> <p>Am beginning to answer questions from what I have found out.</p>	<p>Can see a pattern in my results.</p> <p>Can say what I found out, linking cause and effect.</p> <p>Can say how I could make it better.</p>	<p>Begin to use test results to make predictions to set up further comparatives and fair tests.</p> <p>Begin to look for different causal relationships in their data and identify evidence that refutes or supports their ideas.</p> <p>Use their results to identify when further tests and observations are needed.</p> <p>Begin to separate opinion from fact.</p> <p>Begin to draw conclusions and identify scientific evidence.</p> <p>Can use simple models.</p> <p>Know which evidence proves a scientific point.</p> <p>Begin to use test results to make predictions to set up further</p>	<p>their data and identify evidence that refutes or supports their ideas.</p> <p>Use their results to identify when further tests and observations are needed.</p> <p>Separate opinion from fact.</p> <p>Can draw conclusions and identify scientific evidence.</p> <p>Can use simple models.</p> <p>Know which evidence proves a scientific point.</p> <p>Use test results to make predictions to set up further comparative and fair tests.</p>
--	--	--	--	---	--	--	---

						comparative and fair tests.	
	<p>I can talk about the world around me.</p>	<p>I can begin to talk about what I have found out.</p> <p>I can begin to explain how I carried out my enquiry.</p> <p>I can begin to suggest simple changes to my enquiry.</p>	<p>I can talk about what I have found out.</p> <p>I can explain how I carried out my enquiry.</p> <p>I can suggest simple changes to my enquiry.</p>	<p>I am beginning to draw simple conclusions based on the results of my enquiry.</p> <p>I am beginning to answer my questions using the results of my enquiry.</p> <p>I am beginning to use my findings to make new predictions, suggest improvements and think of new questions.</p> <p>I am beginning sometimes to think of cause and</p>	<p>I can draw simple conclusions based on the results of my enquiry.</p> <p>I can answer my questions using the results of my enquiry.</p> <p>I can use my findings to make new predictions suggest improvements and think of new questions.</p> <p>I can begin to think of cause and effect in my explanations.</p>	<p>I am beginning to come to scientific, conclusions using the results of an enquiry to justify my ideas.</p> <p>I am beginning to explain my conclusion using scientific knowledge and understanding.</p> <p>I am beginning to distinguish opinion and facts.</p> <p>I am beginning to use my findings to make predictions and set up further enquiries.</p>	<p>I can come to a scientific, conclusions using the results of an enquiry to justify my ideas.</p> <p>I can explain my conclusion using scientific knowledge and understanding.</p> <p>I can distinguish opinion and facts.</p> <p>I can use my findings to make predictions and set up further enquiries</p> <p>I can begin to use abstract models to explain my ideas.</p>

				effect in my explanations.		I can begin to use abstract models to explain my ideas.	
Vocabulary	<p>Copy what adults do, taking 'turns' in conversations (through babbling) and activities. Try to copy adult speech and lip movements. (22-36 months)</p> <p>Use a wider range of vocabulary. Engage in extended conversations about stories, learning new vocabulary. Talk about what they see, using a wide vocabulary. Use a wider range of vocabulary. (30-50 months)</p> <p>Learn new vocabulary. Use new vocabulary through the day. (40-60 months)</p> <p>Use new vocabulary in different contexts.</p>	<p>Use some simple scientific language</p> <p>Begin to use some science words.</p> <p>Use comparative language with support.</p>	<p>Use simple scientific language and some science words.</p> <p>Use comparative language – bigger, faster etc</p>	<p>Begin to use some scientific language to talk and, later, write about what they have found out.</p> <p>Begin to use relevant scientific language.</p> <p>Begin to use comparative and superlative language.</p>	<p>Use some scientific language to talk and, later, write about what they have found out.</p> <p>Use relevant scientific language.</p> <p>Use comparative and superlative language</p>	<p>Am beginning to read, spell and pronounce scientific vocabulary correctly.</p> <p>Am beginning to use relevant scientific language and illustrations to discuss, communicate and justify scientific ideas.</p> <p>Am beginning to confidently use a range of scientific vocabulary.</p> <p>Am beginning to use conventions such as trend, rogue result, support prediction and -er word generalisation.</p>	<p>Can use scientific ideas when describing simple processes. Can use the correct science vocabulary</p>

	<p>Listen to and talk about selected non-fiction to develop a deep familiarity with new knowledge and vocabulary. Use new vocabulary in different contexts (40-60 months)</p>					<p>Am beginning to use scientific ideas when describing simple processes. Am beginning to use the correct science vocabulary</p>	
	<p>I am learning new words.</p>	<p>I can begin to use simple scientific language.</p> <p>I can begin to describe what I see eg something is long.</p> <p>I can begin to compare eg something is longer or shorter.</p>	<p>I can use simple scientific language.</p> <p>I can describe what I see.</p> <p>I can compare eg something is longer or shorter.</p>	<p>I am beginning to use some scientific language in my work.</p> <p>I am beginning to describe my observations and my findings.</p> <p>I am beginning to use comparative and superlative descriptions eg <u>longer</u> / <u>shorter</u> than, longest / shortest.</p> <p>I can begin to describe cause and effect.</p>	<p>I can use comparative and superlative descriptions eg <u>longer</u> / <u>shorter</u> than, longest / shortest.</p> <p>I can begin to describe cause and effect.</p>	<p>I am beginning to read, spell and pronounce scientific vocabulary correctly.</p> <p>I am beginning to confidently use the correct scientific language when appropriate.</p> <p>I am beginning to explain my ideas with scientific reasons.</p> <p>I am beginning to use scientific conventions eg trends, rogue result, support prediction.</p>	<p>I can read, spell and pronounce scientific vocabulary correctly.</p> <p>I can confidently use the correct scientific language when appropriate.</p> <p>I can explain my ideas with scientific reasons.</p> <p>I can use scientific conventions eg trends, rogue result, support prediction.</p>

<p>Understanding</p>	<p>Be able to express a point of view and to debate when they disagree with an adult or a friend, using words as well as actions. (30-50 months)</p> <p>Talk about what they see, using a wide vocabulary. (30-50 months)</p> <p>Respond to what they have heard, expressing their thoughts and feelings. (30-50 months)</p>	<p>Can begin to talk about how science helps us in our daily lives eg. torches and lights help us see when it is dark.</p> <p>Am beginning to understand science can sometimes be dangerous.</p>	<p>Can talk about how science helps us in our daily lives eg. torches and lights help us see when it is dark.</p> <p>Am beginning to understand science can sometimes be dangerous.</p>	<p>Begin to know which things in science have made our lives better.</p> <p>Can begin to understand risk in science</p>	<p>Knows which things in science have made our lives better.</p> <p>Can understand there is some risk in science.</p>	<p>Am beginning to talk about how scientific ideas have changed over time.</p> <p>Am beginning to explain the positive and negative effects of scientific development.</p> <p>Am beginning to see how science is useful in everyday life.</p> <p>Am beginning to say which parts of our lives rely on science.</p>	<p>Can talk about how scientific ideas have changed over time.</p> <p>Can explain the positive and negative effects of scientific development.</p> <p>Can see how science is useful in everyday life.</p> <p>Can say which parts of our lives rely on science.</p>
	<p>I can respond to what I see or hear.</p>	<p>I can say how science helps us in our daily lives.</p> <p>I can say how science can be dangerous eg electricity can give you a shock.</p>	<p>I can say how science helps us in our daily lives.</p> <p>I can say how science can be dangerous eg electricity can give you a shock.</p>	<p>I am beginning to know which things in science have made our lives better eg computers in schools, hospitals etc</p> <p>I can begin to understand risk in science..</p>	<p>I know some things in science which have made our lives better eg computers in schools, hospitals etc</p> <p>I understand there is some risk in science..</p>	<p>I am beginning to see how science is useful in lots of different ways.</p> <p>I am beginning to say which parts of our lives rely on science.</p> <p>I am beginning to explain the positive and negative effects of scientific developments.</p>	<p>I can see how science is useful in lots of different ways.</p> <p>I can say which parts of our lives rely on science.</p> <p>I can explain the positive and negative effects of scientific developments.</p>
